

Aggrameter® Moisture Meter for Sand and Aggregates

GEO-CON
PRODUCTS PTY LTD

The Aggrameter® moisture meter delivers rapid determination of the moisture content of sand, fine and coarse aggregate using a unique microwave sensor.

The Aggrameter® utilizes the latest microwave and microprocessor technology to measure moisture content in various fine and coarse-grained materials. The prongs of the probe are inserted into the material to be tested and the percentage of moisture content is instantaneously shown on the easy to read display.

The Aggrameter® comes calibrated for both sand and aggregate, and can be programmed by the user with up to ten different materials.

- Fast and easy to use
- Accurate & Instantaneous
- Extension Pole for Less Fatigue
- Completely Portable
- Max aggregate size approx. 9.5mm
- Moisture range 0-20 % by dry weight
- Kit supplied in a robust field case
- Made in the USA
