

Round Determinate Panel (RDP) Test Mould

The Geo-Con Round Determinate Panel (RDP) test moulds have been designed to be robust and easy to use and handle. They feature forklift tine channels to reduce manual handling and safety risks.

ASTM C1550

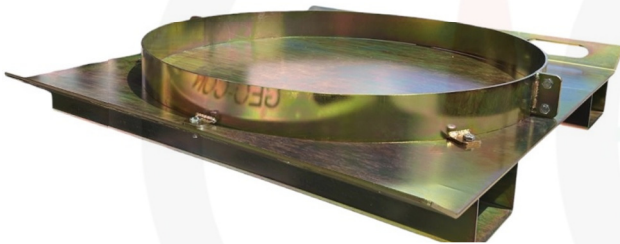

Geo-Con's RDP moulds are plated steel construction, designed to prevent any distortion and to maintain the panel diameter within specification.

They are easily stackable and feature forklift tine channels which aid in handling and the demoulding process.

The forklift tines can be tilted forward to assist with demoulding once the ring bolts are undone.

The sloped sides assist with manual handling as well as help prevent the cast panel from slipping off sideways during demoulding.

The mould ring comprises 2 pieces for ease of demoulding.

Specifications

Ring Dimensions	800mm dia x 75mm ht
Overall Dimensions	1070mm x 900mm x 190mm
Weight	50kg approx.
